THEME HIGHLIGHTS

Closing the project is always a challenging endeavour. It is a process with final result to conclude your project successfully. Standish Group's Chaos studies (since 1994) has indicated that more than 50% of projects have closure issues or being terminated.

BEGIN WITH AN END IN MIND. It is imperative that project leaders strategize in the early stage of the project to gain buy-in from the stakeholders, to manage the acceptance and procurement closure, and to successfully realize the benefits to be delivered by the project to meet stakeholders expectations. Thus the theme **STRATEGIC CLOSURE**, [and the beginning of a NEW "Chapter" !] and the Master Class designed to address issues pertaining to Managing Contract Closure, Requirements and Stakeholder Conflict.

Never has so many Senior Managers, Strategists and Project Management Professionals been gathered in one place at one time – all focused on helping to enhance your project management capabilities. PLUS, our 10th Anniversary Celebration, food, exhibits, and the chance to network in a dynamic, goal-oriented learning environment.

WHO
SHOULD
ATTEND

Project, Program, Portfolio,
Functional Managers,
Product Owner, Business
Analysts or Consultants who
find it challenging to get
project closure successfully.

ABOUT MSCPMP CIRCLE

The PM fraternity witnessed a new leaf in the history of project management practice in Malaysia, with the birth of the much anticipated MSCPMP Circle on 2 January 2008. Conceived as an EXCLUSIVE platform for Malaysian PMPR holders to SOCIALIZE and NETWORK, to SHARE industry experiences and to ADVANCE the project management discipline in a friendly, supportive environment, the MPC also facilitates an annual programme of quarterly forums, conferences, workshops and seminars to promote continuous professional development of fellow members.

These activities enable members to learn in a CONDUCTIVE environment, and at the same time, enable them to earn the PDUs (Professional Development Units) necessary to maintain their active PMP® status throughout the year.

MPC's Mission:

- To be an effective platform for the PMP to pursue continuing certification requirements,
- To nurture the spirit of networking and knowledge sharing within the project management profession,
- To provide opportunities for career advancement
