

Why should a project manager understands IT service management

As a project manager, have you encountered any compliance issues when you have completed your testing and ready to hand over to operation for full deployment? Do you have any difficulty to communicate to data center managers and his infrastructure/security team?

If you are System Integrator, do you place the Customer's operation team as one of your critical stakeholders? What is your stakeholder engagement strategy? How can we close the gap between Project Management and IT Services Management? **SIG #2/2015 will address bridging the gap.**

We are inviting experienced project managers and operation managers to share with you their experiences, giving you some tips on how to strategize your transition plan, and how to mitigate acceptance risks and manage the operation team expectations.

Join us in this session and understand more:

- Benefits of IT service management
- Why should project manager knows about ITSM?
- Transition planning
- What are the risks to mitigate during transition
- What are the value of ITSM in projects
