

EFFECTIVE CONSULTING SKILL FOR PROJECT MANAGER

The Changing Role of Project Managers: From Project Delivery to Value Creation

Innovation and transformation is the “Buzz” word for most organization in 2012 including the government. In this competitive business world, “changes” are almost required very rapidly. Therefore, the needs to create business value from a project perspective have become more crucial and challenging.

An effective consulting skill is essential for project managers in order to successfully deliver an engagement, which will contribute to create business value. Project Managers these days are too focusing in delivering the technicality of a project and very often ignoring the tangible contribution to the business.

This workshop is to provide Project Managers with an interactive experience that aims to improve their consulting skills that are essential in managing and conducting successful engagements. This practical workshop covers the consulting skills for project managers to create value through their projects to transform businesses into innovation and sustainable model.

BENEFITS

By the end of this workshop, you should be better able to:

1. Experience the consulting way of thinking
2. Apply appropriate and consistent data collection and analysis tools and techniques to analyze issues in a team based environment
3. Handling various method of questioning and problem solving technique
4. Describe how Creativity and innovation can add value to client solutions
5. Provide client recommendations based on best available evidence
6. Conduct engagements using effective client-facing skills such as personal presence, interviewing, facilitation and relationship development
